Maintainability

Exceptional Service and
a Reliable Partnership

Performance

Durability, Strength, and Precision

Earthmoving, road construction, or sewer constructions are performed effortlessly every day by Liebherr wheeled excavators. Their constant power, speed, and precision make any job a success.

Maximum Performance

High Performance

The superiorly engineered uppercarriage designs separates the mounting of the hoist cylinders. This allows the machine to have outstanding lift capacities close to the machine. The A 918 Litronic even exceeds the lift capacities of the next higher machine class which allows it to offer better performance in high demanding situations.

Working Modes

The working speed of the machine can easily be adjusted to any application by the use of the work MODE button. The Liebherr wheeled excavator is able to work at high speeds while still doing simultaneously movements. Excavation, backfilling and grading tasks can be completed quicker and on time.

Liebherr Tires

Increased stability when working is provided by the twin tires without an intermediate ring and with offset cleats. The higher air pressure of the tires also ensures that there are fewer vibrations of the machine when driving. Higher traction on soft ground and low ground pressure are achieved with the larger contact surfaces of the Liebherr tires.

Travel Drive

- Higher traction for fast acceleration and the powerful engine allows for top speed up hills
- Reduces unproductive travel time between tasks and on the building site
- Faster on site – More productive

Digging Force

- High digging and breakout force in the field
- Continuously high digging performance even in tough ground
- More digging force for faster results

Joystick Steering

- The optional joystick steering function enables the operator to steer the wheeled excavator using the mini-joystick
- Working and travelling movements can be done simultaneously with having to adjust your hands
- More efficient operation for greater productivity

Economy

A Sound Investment – Optimum Economy and Environmentally Friendly

Low fuel consumption and reduced emissions with consistent performance maximise productivity. The efficiency of the wheeled excavator can be further increased by using a Liebherr productive bucket, fuel-saving Liebherr hydraulic oil or a Liebherr quick coupler system.

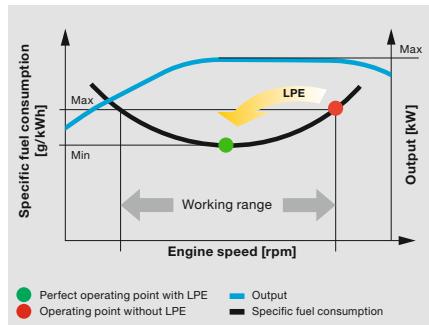

Maximum Efficiency

Fuel Efficiency and Exhaust Gas Aftertreatment

The D924 diesel engine helps to preserve the environment and its resources with low fuel consumption and reduced emissions. Liebherr uses an innovative SCR-system (selective catalytic reduction), consisting of an SCR catalytic converter system and other components such as an injector and AdBlue® supply to achieve emissions stage Tier 4 final. This reduces emissions of nitrogen oxides (NOX) of over 90 percent, is maintenance free and designed for the life period of the machine.

Engine Idling and Engine Shut-down

The standard automatic idling function reduces the engine speed to idle as soon as the operator takes his hand from the joystick so that no hydraulic function is activated. Proximity sensors in the joystick levers restore the original engine speed as soon as the operator's hand is moved towards the lever again. This ensures that the set engine speed is available immediately. The result is a combination of fuel saving and reduced noise levels. Operating costs can be reduced even further with the optional automatic engine shut-down function.

Low Emissions and Operating Costs

- Innovative SCR system for compliance with emissions standard Tier 4 final
- Lower emissions – Lower operating costs – Economic environmental protection

Low Fuel Consumption Thanks to Intelligent Machine Control

- Liebherr-Power Efficiency (LPE) optimises the interaction of the drive components in terms of efficiency
- LPE enables machine operation in the area of the lowest specific fuel use for less consumption and greater efficiency with the same performance

Liebherr Quick Coupling System LIKUFIX

- Faster and safer changing of mechanical and hydraulic attachments from the operator's cabin
- Machine utilization increased to up to 90 % thanks to extended deployment options
- Visual and acoustic check of correct locking position of tool at quick coupling system by two proximity sensors

Increased Productivity

Liebherr Attachments and LIKUFIX

To boost the productivity of its construction machines, Liebherr offers a broad range of attachments for different fields of application. Furthermore, the hydraulic excavators can also be equipped with the Liebherr LIKUFIX hydraulic quick coupling system. The combination of a hydraulic Liebherr quick coupling system with the LIKUFIX coupling block permits fast safe changing of mechanical and hydraulic attachments from the operators cab. This boosts productivity on average by 30 %.

Efficient Management

LiDAT, Liebherr's own data transmission and positioning system, facilitates efficient management, monitoring and control of machinery data recording, data analysis, fleet management and service. All of the important machinery data can be viewed at any time on a web browser. LiDAT provides you comprehensive work deployment documentation, greater availability thanks to shorter downtimes, faster support from the manufacturer, quicker detection of strain/overload and subsequently a longer service life of the machine as well as greater planning efficiency.

Reliability

Competence, Consistency, Innovation – Proven Experience

Reliability offers safety. Safety that significantly influences the success of a project. Whatever the weather, Liebherr stands for safety – with reliable construction machines and customer-oriented sales and service partners. This means a Liebherr construction machine is exactly what it should be: an investment that pays off.

More Safety

Electronic Height Limit

For applications that have height restrictions because of obstructions in the overhead working area the wheeled excavator can be equipped with an electronic height limiter. The maximum permissible working height can be freely selected and stops the movement of the equipment when the set working height is reached. This helps avoid damage to the machine and its environment.

Pipe Fracture Safety Valves

The standard pipe fracture safety valves on the stick and hoist cylinders prevent the equipment from falling uncontrollably and ensure maximum safety for personal working around the machine.

High Machine Availability

Quality and Competence

Our product experience, our understanding of technical design and feedback from customers, sales and service form the basis for the use of pioneering ideas and have always been an integral part of our recipe for success. Key components such as electronic components, slewing ring, slewing drive and hydraulic cylinders are developed and manufactured in-house. Our great production depth guarantees the highest possible quality and allows the components to be coordinated perfectly.

Robust Design

All steel components are designed and manufactured by Liebherr. High strength steel plates engineered for the toughest of requirements resulting in high torsional strength and optimal absorption of machine forces for longer machine service life.

QPDM – Quality and Process Data Management

- QPDM allows production data to be logged, documented and evaluated
- Automation of documentation and test specifications
- Ability to handle large quantities and maintain uniform high quality

More Rear and Side Visibility

- The standard rear-view camera gives the operator optimal view of his working area and surrounding machines at all times
- Extensive glazing in combination with two standard monitoring cameras ensure safe handling of the machine at all times

Bright, Longlife Lighting

- The LED rear lights fitted as standard not only look good, but they are also brighter than halogen lighting and have an extremely long service life
- The LED front outline markers fitted as standard make it easier to see the machine on the road increasing worker safety

Comfort

Ergonomic Excellence – Superior Operators Cab Design for Comfort and Wellbeing

The modern Liebherr operators cab with a standard air suspension heated drivers seat and automatic air-conditioning provides a pleasant working atmosphere allowing for the best work conditions for operators. The ergonomic control elements with touchscreen display also simplify the operation of the wheeled excavator. The extensive safety equipment includes the rollover protection system (ROPS) for the cab fitted as standard according to ISO 12117-2.

First-class Cab

Automatic Air Conditioning

Liebherr offers an intuitive automatic air conditioning system that can be adjusted easily by using the touchscreen display. The filter for cab air can be changed easily from outside the cab.

Radio with Hands-free Device

The optional Liebherr radio is MP3-compatible, has a USB connection and can be used as interface for the integral hands-free kit. If the machine operator connects his smartphone to the radio using Bluetooth, the touchscreen can be used to control phone calls. This means that all media, including the radio, MP3 or phone calls, are controlled using a central unit which provides greater clarity, simplicity and comfort.

Smooth Operation

The use of visco-elastic mounts, good noise insulation and modern, smooth Liebherr diesel engines minimise noise emissions and vibrations.

Refuelling

- Using the optional refuelling pump, the machine can be refuelled directly from a fuel container
- Remote cable operation and automatic shut off when the tank is full, for greater convenience and shorter refuelling times
- Topping up – simple, quick and safe

Operator's Seat with Adjustable Armrests

- Greater seating comfort due to variable damper hardness, lockable horizontal suspension, pneumatic lumbar support, seat heating and passive seat air conditioning for concentrated working
- Individual adjustment options for armrests, seat cushion depth, seat angle and head restraint for comfortable working

Intuitive Operation

- Display of the machine data and camera image on the 7 inch touch screen display unit
- 20 programmable tool control settings for easily setting oil pressure and oil flow
- Quick access keys can be programmed by the machine operator for frequently used menu items

Comfortable Operation

Joystick with Proportional Control

The 4-way mini-joystick allows the operator to control the dozer blade, working tool, and steering of the machine. The rocker switches on each joystick also increases the functions on the wheeled excavator. The slim, ergonomic design rounds off the operating concept.

Control Unit

The large touchscreen provides the operator with a fast, uncomplicated interface which delivers all the information required for working with the machine. A flat, intuitive menu system ensures that it can be readily understood so that the control unit can be used in a highly productive way.

Detailed Solutions

Numerous details provide greater comfort and efficiency. For example, there is a choice of two different steering wheel versions: The thin steering wheel is recommended for regular civil engineering works as it affords better visibility of the working area. Also, the stabiliser blade does not have any lubrication points and is maintenance-free. No need for time-consuming lubrication.

Maintainability

Exceptional Service and a Reliable Partnership

Liebherr wheeled excavators are not only powerful, robust, precise and efficient, they are also designed with machine service principle in mind. Maintenance is performed quickly, simply and safely. This reduces maintenance costs and keeps machine downtimes to a minimum.

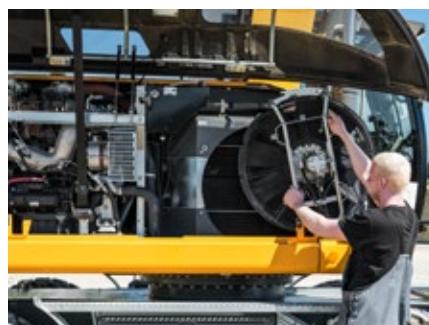

Simplified Maintenance Concept

Service-based Machine Design

The service-based machine design guarantees short servicing times, thus minimising maintenance costs due to the time it saves. All the maintenance points are easily accessible from the ground and easy to reach due to the large, wide-opening service doors. The enhanced service concept places the maintenance points close to each other and reduces their number to a minimum. This means that service work can be completed even more quickly and efficiently.

Hydraulic Oils with Added Value

Liebherr hydraulic oils achieve a service life of 6,000 operating hours plus. Instead of having defined change intervals, the results of the oil analysis (every 1,000 operating hours or after one year) determine when the oil needs to be changed. The unique Liebherr Hydraulic Plus oil can even achieve a service life of 8,000 operating hours plus at the same time as reducing fuel consumption by up to 5 %. Another reason for the long change intervals is also the comparatively large hydraulic tank capacity. Which enables a long oil settling time. Enclosed air molecules can escape upwards and are not sucked in again. This not only protects the hydraulic oil, it also extends the service life of pumps, valves and hydraulic lines.

Lubrication During Operation

- Fully automatic central lubrication system for the equipment and swing ring
- Can be optionally expanded to the connecting link and quick coupler
- Lubrication without interrupting work for higher productivity

Optimum Service Access

- Large, wide-opening and automatically locking service doors
- Engine oil, fuel, air and cab air filter can be reached conveniently and safely from ground level
- The oil level in the hydraulic tank can be checked from the cab
- Short service times for greater productivity

Rapid Spare Parts Service

- 24-hour delivery: Spare parts service is available for our dealers around the clock
- Electronic spare parts catalogue: Fast and reliable selection and ordering via the Liebherr online portal
- With online tracking, the current processing status of your order can be viewed at any time

Your Competent Service Partner

Remanufacturing

The Liebherr remanufacturing program offers cost-effective reconditioning of components to the highest quality standards. Various reconditioning levels are available including replacement components and general overhaul or repair. The customer receives components with original part quality at a reduced cost.

Competent Advice and Service

Competent advice is given at Liebherr. Experienced specialists provide advice for your specific requirements: application-oriented sales support, service agreements, cost effective repair alternatives, original parts management, as well as remote data transmission for machine planning and fleet management.

Wheeled Excavator A 918 Litronic

Overview

Technology for Maximum Performance and Economy

- Liebherr diesel engine Tier 4 Final compliant
- Emissions treatment with Liebherr-SCR technology
- Load-sensing-control
- Liebherr-Power-Efficiency (LPE)
- MODE selection (Sensitive, ECO, Power, Power-Plus)
- Sensor-controlled automatic idling system
- Close-mesh protective grid in front of cooler intake

Simplified Maintenance Concept for Maximum Productivity

- Fully automatic central lubrication system for uppercarriage and equipment
- Large, wide-opening service doors
- Central maintenance points accessible from the ground
- Hydraulic shut-off lock
- Liebherr hydraulic oil biologically degradable (optional)
- Cab air filter can be replaced quickly and conveniently from outside
- Storage compartment left – lockable
- Extended tool equipment (optional)

Ergonomic Operator's Work Station for Maximum Comfort

- Operator's seat Comfort/Premium (optional)
- Automatic air-conditioning system
- 7" color touchscreen display
- Direct access keys
- Adjustable armrests
- Resonant, ergonomic joysticks
- Joystick steering (optional)
- Proportional control with 4-way mini-joystick
- Large windows
- Convenient radio operation with hands-free device
- Tool Control for attachments
- Front guard, adjustable (optional)
- LED lights (optional)
- Rear and side camera monitoring

Superbly Designed Equipment for Maximum Reliability

- Various boom versions and stick lengths
- Liebherr hydraulic cylinders
- Pipe fracture safety valves hoisting and stick cylinders
- Overload warning device
- Load holding valve on stabilization cylinder
- Electronic lift limitation (optional)
- Liebherr quick coupling systems (optional)
- Wide selection of Liebherr attachments (optional)

Technical Data

Diesel Engine

Rating per SAE J1349/ISO 9249	161 HP (l) (120 kW) at 1,800 rpm
Model	D924 – FPT motor designed for Liebherr
Type	4 cylinder in-line
Bore/Stroke	4.1/5.2 in
Displacement	274.6 in ³
Engine operation	4-stroke diesel Common-Rail turbocharged and after-cooled reduced emissions
Air cleaner	dry-type air cleaner with pre-cleaner, primary and safety elements
Engine idling	sensor controlled
Electrical system	
Voltage	24 V
Batteries	2 x 135 Ah / 12 V
Alternator	three-phase current 28 V / 140 A
Stage Tier 4f	
Harmful emissions values	in accordance with EPA/CARB-40CFR stage Tier 4f
Emission control	Liebherr-SCR technology
Option	Liebherr particle filter
Fuel tank	97.5 gal
Urea tank	12 gal

Cooling System

Diesel engine	water-cooled compact cooling system consisting cooling unit for water, hydraulic oil and charge air with stepless thermostatically controlled fan, fans for radiator cleaning can be completely folded away
----------------------	--

Hydraulic Controls

Power distribution	via control valves with integrated safety valves, simultaneous and independent actuation of chassis, swing drive and equipment
Servo circuit	
Equipment and swing	with hydraulic pilot control and proportional joystick levers
Chassis	electroproportional via foot pedal
Additional functions	via switch or electroproportional foot pedals
Proportional control	proportionally acting transmitters on the joysticks for additional hydraulic functions

Hydraulic System

Hydraulic pump	Liebherr axial piston variable displacement pump
for equipment and travel drive	79 gpm
Max. flow	5,076 psi
Max. pressure	Liebherr-Synchron-Comfort-system (LSC) with electronic engine speed sensing regulation, pressure and flow compensation, torque controlled swing drive priority
Hydraulic pump regulation and control	
Hydraulic tank	41 gal
Hydraulic system	max. 92.5 gal
Hydraulic oil filter	1 main return filter with integrated partial micro filtration (5 µm)
MODE selection	adjustment of engine and hydraulic performance via a mode pre-selector to match application, e.g. for especially economical and environmentally friendly operation or for maximum digging performance and heavy-duty jobs
S (Sensitive)	mode for precision work and lifting through very sensitive movements
E (Eco)	mode for especially economical and environmentally friendly operation
P (Power)	mode for high performance with low fuel consumption
P+ (Power-Plus)	mode for highest performance and for very heavy duty applications, suitable for continuous operation
Engine speed and performance setting	stepless alignment of engine output and hydraulic power via engine speed
Option	Tool Control: 20 preadjustable pump flows and pressures for add-on attachments

Swing Drive

Drive	Liebherr axial piston motor with integrated brake valve and torque control, Liebherr planetary reduction gear
Swing ring	Liebherr, sealed race ball bearing swing ring, internal teeth
Swing speed	0 – 10.0 rpm stepless
Swing torque	39,828 lbf ft
Holding brake	wet multi-disc (spring applied, pressure released)
Option	pedal controlled positioning swing brake slewing gear brake Comfort

Operator's Cab

Cab

ROPS safety cab structure (roll-over protection system) with individual windscreens or featuring a slide-in subpart under the ceiling, work headlights integrated in the ceiling, a door with a sliding window (can be opened on both sides), large stowing and depositing possibilities, shock-absorbing suspension, sounddamping insulating, tinted laminated safety glass, separate window shades for the sunroof window and windscreens

Operator's seat Standard

air cushioned operator's seat with 3D-adjustable armrests, headrest, lap belt, seat heater, manual weight adjustment, adjustable seat cushion inclination and length and mechanical lumbar vertebrae support

Operator's seat Comfort (Option)

in addition to operator's seat standard: lockable horizontal suspension, automatic weight adjustment, adjustable suspension stiffness, pneumatic lumbar vertebrae support and passive seat climatization with active coal

Operator's seat Premium (Option)

in addition to operator's seat comfort: active electronic weight adjustment (automatic re-adjustment), pneumatic low frequency suspension and active seat climatization with active coal and ventilator

Control system

joysticks with control consoles and swivel seat, folding left control console

Operation and displays

large high-resolution operating unit, selfexplanatory, color display with touchscreen, video-compatible, numerous setting, control and monitoring options, e.g. air conditioning control, fuel consumption, machine and attachment parameters

Air-conditioning

automatic air-conditioning, recirculated air function, fast de-icing and demisting at the press of a button, air vents can be operated via a menu; recirculated air and fresh air filters can be easily replaced and are accessible from the outside; heating-cooling unit, designed for extreme outside temperatures, sensors for solar radiation, inside and outside temperatures (country-dependent)

Undercarriage

Drive

oversized two speed power shift transmission with additional creeper speed, Liebherr axial piston motor with functional brake valve on both sides

Pulling force

Travel speed

28,551 lbf

0 – 2.2 mph stepless (creeper speed off-road)
0 – 4.3 mph stepless (off-road)
0 – 8.1 mph stepless (creeper speed on-road)
0 – 12.4 mph stepless (road travel)
0 – max. 23.0 mph Speeder (Option)

Driving operation

automotive driving using accelerator pedal, cruise control function: storage of variable accelerator pedal positions, both off-road and on-road

Axes

manual or automatic hydraulically controlled front axle oscillation lock

Service brake

two circuit travel brake system with accumulator; wet and backlash-free disc brake

Automatic digging brake

works automatically when driving off (accelerator pedal actuation) and when the machine is stationary (engagement); the digging brake engages automatically – can be coupled with automatic swing axle lock

Holding brake

wet multi-disc (spring applied, pressure released)

Stabilization

rear stabilizer blade (adjustable during travel for dozing)
rear stabilizer blade + front outriggers
rear outriggers + front stabilizer blade
rear + front outriggers

EW-undercarriage 9'

Equipment

Type

high-strength steel plates at highly stressed points for the toughest requirements. Complex and stable mountings of equipment and cylinders

Hydraulic cylinders

Liebherr cylinders with special sealing and guide system and, depending on cylinder type, shock absorption

Bearings

sealed, low maintenance

Complete Machine

Lubrication

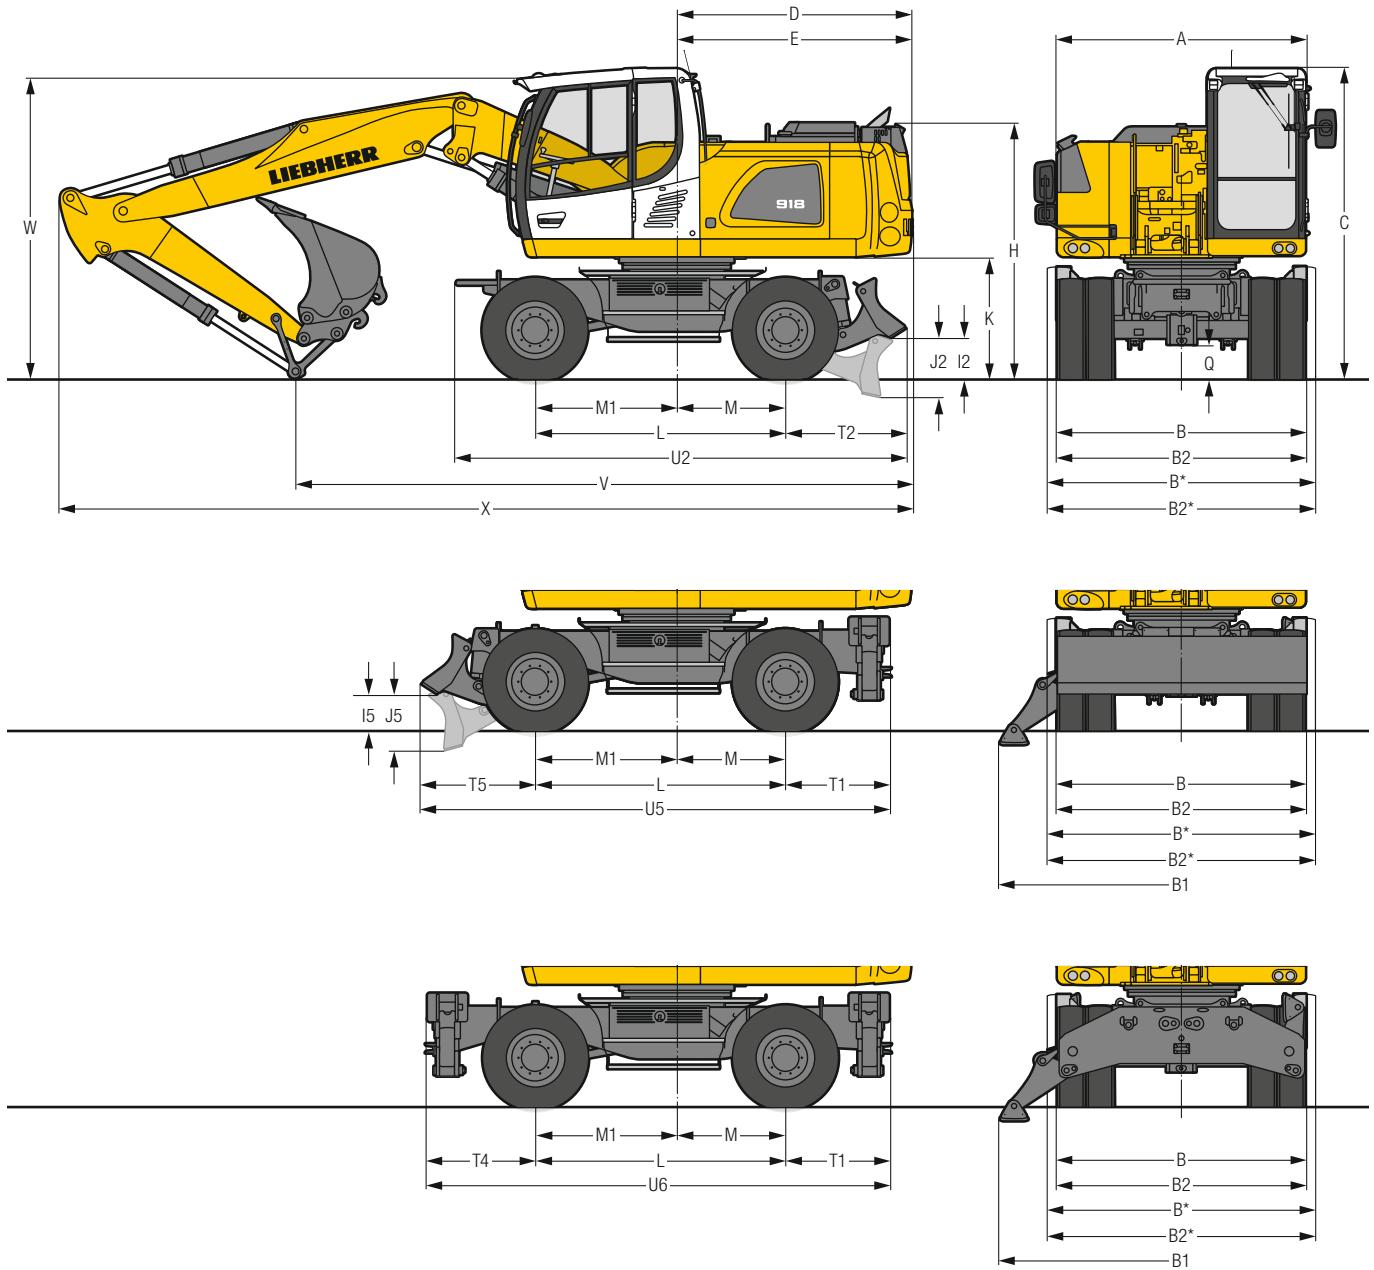

Liebherr central lubrication system for upper-carriage and equipment, automatically

Noise emission

ISO 6396
2000/14/EC

L_{PA} (inside cab) = 71 dB(A)
 L_{WA} (surround noise) = 101 dB(A)

Height

Can be slewed through 360°

In longitudinal position of undercarriage

Max. reach

* Limited by hydr. capacity

The lift capacities on the load lift hook of the Liebherr quick coupler SWA 33 without attachment are stated in lb x 1,000 and are valid on a firm, level supporting surface with blocked oscillating axle. These capacities can be slewed through 360° with the undercarriage in the transverse position. Capacities in the longitudinal position of the undercarriage (+/- 15°) are specified over the steering axle with the stabilizers raised and over the rigid axle with the stabilizers down. The values apply when the adjusting cylinder is in the optimal position. Indicated loads based on the ISO 10567 standard and do not exceed 75% of tipping or 87% of hydraulic capacity, or are limited by the permissible load of the load lift hook on the quick coupler (max. 11,000 lb). Without the quick coupler, lift capacities will increase by up to 240 lb.

Height

Can be slewed through 360°

In longitudinal position of undercarriage

Max. reach

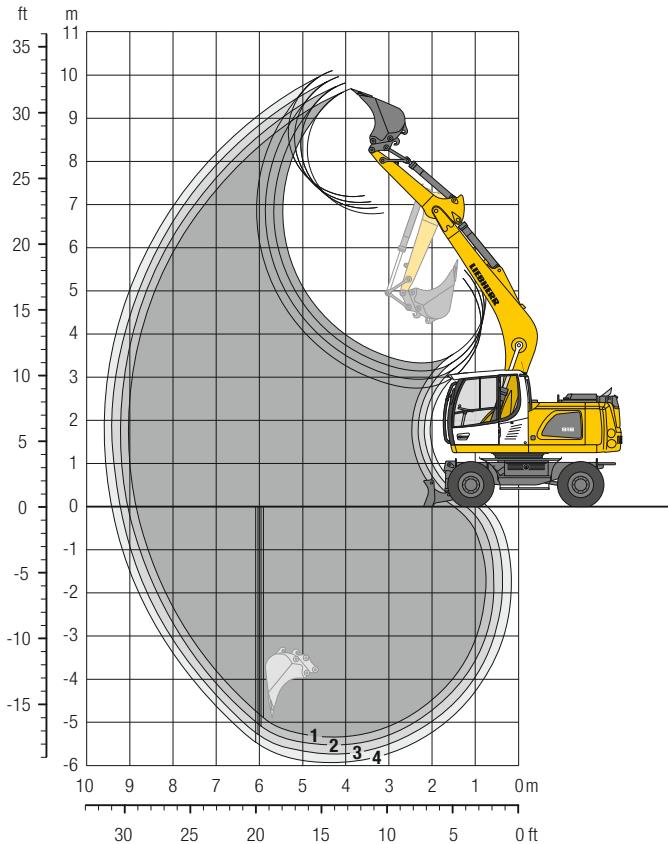

*** Limited by hydr. capacity**

The lift capacities on the load lift hook of the Liebherr quick coupler SWA 33 without attachment are stated in lb x 1,000 and are valid on a firm, level supporting surface with blocked oscillating axle. These capacities can be slewed through 360° with the undercarriage in the transverse position. Capacities in the longitudinal position of the undercarriage (+/- 15°) are specified over the steering axle with the stabilizers raised and over the rigid axle with the stabilizers down. The values apply when the adjusting cylinder is in the optimal position. Indicated loads based on the ISO 10567 standard and do not exceed 75% of tipping or 87% of hydraulic capacity, or are limited by the permissible load of the load lift hook on the quick coupler (max. 11,000 lb). Without the quick coupler, lift capacities will increase by up to 240 lb.

Height

Can be slewed through 360°

In longitudinal position of undercarriage

Max. reach

* Limited by hydr. capacity

The lift capacities on the load lift hook of the Liebherr quick coupler SWA 33 without attachment are stated in lb x 1,000 and are valid on a firm, level supporting surface with blocked oscillating axle. These capacities can be slewed through 360° with the undercarriage in the transverse position. Capacities in the longitudinal position of the undercarriage (+/- 15°) are specified over the steering axle with the stabilizers raised and over the rigid axle with the stabilizers down. Indicated loads based on the ISO 10567 standard and do not exceed 75% of tipping or 87% of hydraulic capacity, or are limited by the permissible load of the load lift hook on the quick coupler (max. 11,000 lb). Without the quick coupler, lift capacities will increase by up to 240 lb.

Height

Can be slewed through 360°

In longitudinal position of undercarriage

Max. reach

* Limited by hydr. capacity

The lift capacities on the load lift hook of the Liebherr quick coupler SWA 33 without attachment are stated in lb x 1,000 and are valid on a firm, level supporting surface with blocked oscillating axle. These capacities can be slewed through 360° with the undercarriage in the transverse position. Capacities in the longitudinal position of the undercarriage (+/- 15°) are specified over the steering axle with the stabilizers raised and over the rigid axle with the stabilizers down. The values apply when the adjusting cylinder is in the optimal position. Indicated loads based on the ISO 10567 standard and do not exceed 75% of tipping or 87% of hydraulic capacity, or are limited by the permissible load of the load lift hook on the quick coupler (max. 11,000 lb). Without the quick coupler, lift capacities will increase by up to 240 lb.

Max. material weight ■ = ≤ 3,034 lb/yd³, ■ = ≤ 2,528 lb/yd³, Δ = ≤ 2,023 lb/yd³, - = not authorized

Clamshell Grab with Mono Boom 17'5"

Digging Envelope

with quick coupler	1	2	3	4	
Stick length	ft in	6' 9"	7'5"	8'	8'8"
Max. digging depth	ft in	21'10"	22'6"	23' 2"	23'9"
Max. reach at ground level	ft in	28' 7"	29'2"	29' 8"	30'4"
Max. dumping height	ft in	20'	20'6"	20'10"	21'4"

Operating Weight

The operating weight includes the basic machine with 8 tires plus intermediate rings, mono boom 17'5", stick 8', quick coupler SWA 33 and clamshell grab model GM 10B/0.59 yd³ (31.5" without ejector).

Undercarriage versions	Weight (lb)
A 918 Litronic with rear blade	39,700
A 918 Litronic with rear outriggers + front blade	41,700
A 918 Litronic with rear + front outriggers	42,100
A 918 EW Litronic with rear blade	40,100
A 918 EW Litronic with rear outriggers + front blade	42,100

Clamshell Grab GM 10B Machine stability per ISO 10567* (75% of tipping capacity)

Equipment

Undercarriage

Dual-circuit braking system	•
Rear stabilizer blade	+
Rear stabilizer blade + front outriggers	+
Lighting trailer coupling	+
Trailer coupling with bolt, automatic	+
Digging brake, automatic	•
Tires (twin tires) Liebherr EM 22 290/90-20	+
Individual control outriggers	+
Travel speed levels (four)	•
Tilt function of trailer, hydraulic	+
Mudguards (rear and front)	+
Load holding valve on each stabilization cylinder	•
Powershift transmission, semiautomatic	•
Parking brake, maintenance-free	•
Rear outriggers + front stabilizer blade	+
Rear + front outriggers	+
Tires, variants	+
Protection for piston rods, stabilizer cylinder	+
Speeder **	+
Storage compartment left – lockable	•
Storage compartment right – lockable	+
Undercarriage EW 9'	+
Tool equipment, extended	+

Operator's Cab

Storage compartment	•
Cab lights rear, LED	+
Cab lights front, halogen (under rain cover)	•
Cab lights front, LED (above rain cover)	+
Cab lights front, LED (under rain cover)	+
Exterior mirror, electrical adjustable, with heating	+
Mechanical hour meters, readable from outside the cab	•
Roof window made from impact-resistant laminated safety glass	+
Slewing gear brake Comfort, button on the left or right joystick	+
Operator's seat Standard	•
Operator's seat Comfort	+
Operator's seat Premium	+
Driving alarm (acoustic signal is emitted during travel, can be switched ON/OFF)	+
Fire extinguisher	+
Front screen made from impact-resistant laminated safety glass – not adjustable	+
Windscreen retractable (including upper part)	•
Intermittent windscreen wiper with wiper washer	•
Cruise control	•
Rubber floor mat, removable	•
Dome light	•
Joystick steering	+
Coat hook	•
Automatic air conditioning	•
Fuel consumption indicator	•
Electric cooler	+
Steering wheel, wide version (cost-neutral option)	+
Steering column adjustable horizontally	•
LiDAT, vehicle fleet management	•
Emergency exit rear window	•
Positioning swing brake	+
Proportional control	•
Radio Comfort, control via display with handsfree set	+
Preparation for radio installation	•
Rain cover over front window opening	•
ROPS cab protection	•
Back-up alarm (acoustic signal is emitted traveling backward, can not be switched off)	+
Amber beacon, on cabin, LED double flash	+
All tinted windows	•
Windscreen wiper, roof	+
Windshield wiper, entire windscreens	•
Door with sliding window	•
Top guard	+
Front guard, adjustable	+
Right side window and windshield made from laminated safety glass	•
Sun visor	+
Sun blind	•
Auxiliary heating, adjustable (week time switch)	+
Electronic immobilizer	+
Cigarette lighter	•

Uppercarriage

Uppercarriage right side light, 1 piece, LED	+
Uppercarriage rear light, 2 pieces, LED	+
Refuelling system with filling pump	+
Main battery switch for electrical system	•
Engine hood with gas spring	•
Amber beacon, at uppcarriage, LED double flash	+
Service doors, lockable	•

Hydraulic System

Shut-off valve between hydraulic tank and pump(s)	•
Pressure test fittings	•
Accumulator for controlled lowering of the equipment with the engine shut down	•
Hydraulic oil filter with integrated microfilter	•
Liebherr hydraulic oil from -4 °F to +104 °F	•
Liebherr hydraulic oil, biologically degradable	+
Liebherr hydraulic oil, specially for warm or cold regions	+
Bypass filter	+
Switchover high pressure circuit and tipping cylinder	+
Switchover high pressure circuit and two-piece boom	+

Diesel Engine

Fuel anti-theft device	+
Liebherr particle filter	+
Reversible fan drive, fully automatic	+
Air pre-filter with dust discharge	+
Automatic engine shut-down (time adjustable)	+
Preheating fuel	+
Preheating coolant*	+
Preheating engine oil*	+

Equipment

Equipment

Boom lights, 2 pieces, halogen	•
Boom lights, 2 pieces, LED	+
Stick lights, 2 pieces, LED	+
High pressure circuit incl. unpressurized return line and Tool Control	+
Electronic lift limitation	+
Security for hoist cylinder for hydraulic attachments	+
Load holding valve bucket cylinder	+
Load lug on stick	+
Leak oil line, additional for attachments	+
Liebherr ditch cleaning bucket	+
Liebherr quick coupler, hydraulic or mechanical	+
Liebherr tilt bucket	+
Liebherr tilt rotator	+
Liebherr sorting grab	+
Liebherr backhoe bucket	+
Liebherr tooth system	+
Liebherr clamshell grab	+
Medium pressure circuit incl. lines	+
Mono boom	+
Pipe fracture safety valves hoist cylinders	•
Pipe fracture safety valve stick cylinder	•
Return line, pressureless (in high pressure circuit option included)	+
Hose quick coupling at end of stick	•
Quick coupling system LIKUFIX	+
Protection for piston rod, bucket cylinder	+
Protection for bottom side of stick	+
Tool Control, 20 attachment adjustments selectable over the display	+
Overload warning device	•
Two-piece boom	+
Offset two-piece boom	+

Complete Machine

Lubrication	
Lubrication undercarriage, manually – decentralized (grease points)	•
Lubrication undercarriage, manually – centralized (one grease point)	+
Central lubrication system for uppercarriage and equipment, automatically (without quick coupler and connecting link)*	•
Central lubrication system, extension for quick coupler	+
Central lubrication system, extension for connecting link	+
Special coating	
Custom painting for attachments	+
Special coating, variants	+
Monitoring	
Rear view monitoring with camera	•
Side view monitoring with camera	•

• = Standard, + = Option

* = country-dependent, ** = depending upon the country partially only 15.5 mph permitted

Options and/or special equipments, supplied by vendors other than Liebherr, are only to be installed with the knowledge and approval of Liebherr in order to retain warranty.
